Clinical Documentation Intelligence

## Powered by Artificial Intelligence, Guided by Coding Excellence

Select Data is the first to leverage the power of artificial intelligence (AI) to transform home health coding and documentation to achieve clinical quality and financial outcomes. Combining industry-leading natural language processing (NLP) and AI with a commitment to clinical documentation improvement (CDI) excellence, Select Data created its SmartCare™ platform, which delivers more precise coding, accurate reimbursement, and actionable feedback to home health agencies.

SmartCare™ Platform

Our proprietary, data-driven AI and NLP platform, SmartCare, is built from years of historical clinical models with successful outcomes. The platform facilitates faster, more accurate coding and documentation reviews.

SMART**CARE**™ TECHNOLOGY

QUALITY & COMPLIANCE · OUTCOMES · DATA SCIENCE · CODING · OASIS REVIEW · AUDITING · CLINICAL DOCUMENTATION IMPROVEMENT

Select Data Impact

Select Data delivers high quality, timely services with the following impact:

35%	**1.3**	**12**	**10.7**
Reduction in reportable readmissions by 35%	Turnaround time of 1.3 days	12 OASIS recommendation made per record	10.7 recommended codes per record

Trusting Select Data to outsource coding and clinical documentation improvement is an effective way to quickly enhance agency operations for many agencies. Select Data offers a wide range of solutions designed to improve clinical and financial outcomes.

OASIS Review

Our experts utilize SmartCare's clinical algorithms to identify needed corrections and areas most likely to have documentation deficiencies. Select Data improves accuracy in OASIS assessment and coding, leading to better patient care coding and success under PDGM.

Coding & CDI

Achieve accurate reimbursement and lower risk of audit with professional, onshore coding and clinical documentation improvement. Powered with advanced technology, Select Data's SmartCare platform enables its expert team of coders to deliver high-quality coding with a quick turnaround.

Auditing

OASIS and coding errors can dramatically impact your bottom line. The Select Data team reviews documentation and coding practices and makes recommendations on strategic improvements for operations and PDGM success.
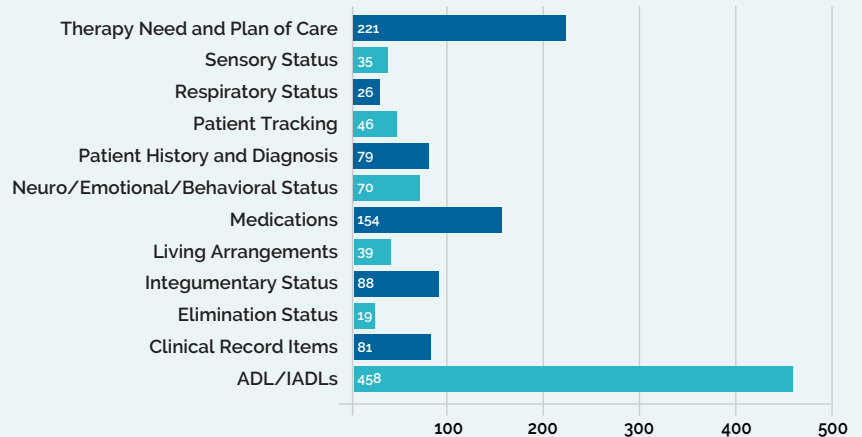

Reporting and Actionable Feedback

Select Data provides in-depth reporting and actionable feedback to its clients. Our proprietary reporting includes:

· Coding Recommendation Summary by Patient

· Diagnosis Items that Impact the POC by Clinical Category

· Summary of co-morbidities Added

· OASIS Recommendations by Category, Clinician and M item

· Turn Around Reporting by Clinician

· Reasons for Query Tracking by Clinician

Clinical Assessment Review | OASIS Recommendations by Section
Demo Home Care

Section	Value
Therapy Need and Plan of Care	221
Sensory Status	35
Respiratory Status	26
Patient Tracking	46
Patient History and Diagnosis	79
Neuro/Emotional/Behavioral Status	70
Medications	154
Living Arrangements	39
Integumentary Status	88
Elimination Status	19
Clinical Record Items	81
ADL/IADLs	458

One of our clients says it best:

"We switched our home health coding to Select Data and immediately noticed the difference. Select Data's coding is thorough with high integrity. The online tools and messaging system allow great coordination and communication."
