

# Caregiver Accelerator

## Empowering Productivity-Driven Decisions

Crafted specifically for home care and hospice agencies, this dynamic solution empowers users with a suite of features designed to make instantaneous, data-driven decisions.

### Elevate Your Operations

Our real-time productivity tool is poised to revolutionize the home care and hospice industry, surpassing current tools' limitations. With real-time data, customizable dashboards, and an intuitive interface, agencies can monitor productivity effectively and make instantaneous decisions grounded in metrics. The result? Enhanced patient care, cost reductions, and revenue growth.

#### 1. Dynamic Dashboard

Gain immediate access to a comprehensive dashboard, offering seamless filtering and sorting capabilities for various caregiver types, including LPNs, RNs, PTs, OTs, STs, social workers, home health/hospice aides, and chaplains. Filter by productivity level, identifying both over- and under-productive caregivers.

#### 2. Tailored Caregiver Filtering

Effortlessly segment caregivers based on employment type - full-time, part-time, and per diem - as well as distinguish new hires and those in training or orientation. Swiftly identify areas where additional training or support may be required to meet productivity goals.

### Benefits

#### Swift Action on Unproductive Caregivers

Identify and schedule caregivers falling below productivity thresholds promptly. Take corrective measures to optimize productivity, cut costs, and elevate patient care.

#### Comprehensive Patient Demographics

Access crucial data, including DX codes, care team information, and day-to-day activities like travel time, charting, and inter-team communication. Seamlessly track PTO, streamlining scheduling and management processes

#### HCHB Log Shipping Integration

Leverage real-time data from Log Shipping for instant updates on clinician and caregiver productivity and status.

#### Customizable Dashboards

Personalize your dashboards for monitoring productivity trends and continual improvement in specific areas as you progress.

#### Seamless Connectivity

Integrate with your payroll and EMR systems, ensuring all data is current and precise.
